

Color, Contrast & Cohesion

with Diane Harris of Stash Bandit

Supply List

Since you'll be sewing from the comfort of your own space, you probably already have everything you need.

Fabric: A nice variety of quilt-weight cotton printed fabrics you love in lights, mediums and darks. Solids are fine, too. Since we will be working in a scrappy style, small pieces are fine but pieces about 12" x 12" are a little more useful and efficient. Don't stress over fabric for this playtime. Whatever you have can be put to good use! You can go totally scrappy or choose a color scheme such as blues and greens or red, white & blue. If you choose a specific color recipe, have lights, mediums and darks available within each color.

Patterns: I will send you several options two to three weeks before class and you can choose one you like. No extra cost, the patterns are included.

Tools: Sewing machine, rotary cutting supplies, general sewing supplies.

Design surface: You will want to have a design wall or vertical surface (like a wall) from which you can stand back at least five or six feet. A piece of flannel on the wall works! You can even use a flannel-backed plastic tablecloth tacked to the wall. A design wall is very important, so I will show you one way to make a portable design wall yourself.

If you have a **smartphone** or **tablet**, having it available during class will allow you to share what you're making with me and others. I am looking forward to unlocking the secrets of color, contrast and cohesion for you!

Watch your email for the patterns and further instructions a few weeks before class.
